TEJAS THOLAR

Cybersecurity Analyst | VAPT | Network Security
Mumbai, India | tejastholar@outlook.com
linkedin.com/in/tejas-tholar-36b016317 | github.com/Tejas-Tholar | tejastholar-portfolio.vercel.app

SUMMARY

BCA student targeting VAPT and SOC analyst roles, with network security experience at Indian Oil Corporation in firewall rules, monitoring and segmentation. Skilled in reconnaissance and vulnerability scanning with Nmap, Nuclei and Wireshark on Kali Linux. Also a developer who knows how vulnerabilities get introduced and fixed.

SKILLS

Security Tools: Nmap, Wireshark, Nuclei, Kali Linux, basic Linux administration
Security Concepts: Vulnerability assessment, network security, firewall management, network segmentation
Programming: Python, C, Java, JavaScript, ASP.NET, PL/SQL, HTML/CSS
Tools: Git, GitHub, WordPress
Soft Skills: Analytical thinking, teamwork, research and self-learning

EXPERIENCE

Network Security Intern — Indian Oil Corporation Ltd. May 2025 – July 2025

- Assisted with firewall configuration and rule management, reviewing and updating access-control rules.
- Performed network security monitoring to identify abnormal traffic and potential security issues.
- Troubleshot LAN connectivity issues and supported network segmentation to isolate network zones.
- Collaborated with the IT team to apply security best practices across systems and user endpoints.

PROJECTS

Skillora — Founder & Developer (in development) Feb 2026 – Present
AI-powered personalised learning platform | skillorai.in

- Building a platform that generates AI-driven courses and learning roadmaps tailored to each student's goals.
- Developing student progress tracking and adaptive learning paths that adjust to performance.
- Designing for multilingual learning in 10+ Indian languages to widen access beyond English.

Volunteer Connect — Full-Stack Volunteer Management Platform React, Node.js, PostgreSQL
OWASP-aligned platform connecting volunteers and NGOs | volunteer-connect-gold.vercel.app

- Secured with JWT + bcrypt auth, role-based access (Volunteer/NGO/Admin), rate limiting and audit logs.
- Built event applications, attendance verification and PDF certificate generation (PDFKit, Prisma).

DineFlow — Smart Restaurant Ordering & Management Next.js
Contactless QR-code ordering system for restaurants | dineflow-zeta.vercel.app

- Built QR table ordering, real-time kitchen order tracking and dispatch, staff login, UPI/card/cash payments.

Traffic Violation Detection System — Academic Project (SY BCA) ASP.NET
Web-based road safety reporting portal | trafficviolation.bsite.net

- Developed a web platform where citizens report traffic violations and upload supporting evidence.
- Built the authority-side workflow to verify submitted reports and take action on confirmed violations.

EDUCATION

Bachelor of Computer Applications (BCA) — Somaiya Vidyavihar University, Mumbai 2024 – 2027 (expected)

CERTIFICATIONS

- **Network Security** — Cisco (Coursera)
- **Kali Linux** — Board Infinity (Coursera)
- **Ethical Hacking** — IIT Bombay Techfest
- **Git & GitHub for Beginners**
